

ABSTRACT OF THE DISCLOSURE

A belt for carrying baby equipment has an insulated, generally cylindrical pocket for carrying a feeding bottle or a feeding cup and a generally rectangular pocket for carrying a telephone. The rear of the belt has an elongated rectangular pocket which has a top opening and a pair of side opening for storing a changing pad and clean diapers. The inside of the belt has a pair of pockets for storage of various items. The cylindrical pocket and the rectangular pocket are adjustably mounted on the belt. The upper edge of the rear pocket is elasticized to combine security with easy access.
